

always on • secure • reliable • cloud

Securely and efficiently managing end-user day to day IT requirements can be a painful and costly exercise for a business. Likewise is ensuring an IT budget has flexibility to address the demands placed on it by end-user operational needs. Add on top the hassle to deploy software or updates, ensure malware is up-to-date, or simply trying to assist a mobile user.

imagine having your end-user assets seamlessly monitored and maintained. imagine having a service that doesn't need onsite infrastructure or costly licenses. imagine having a flexible end-user management service that adapts with your business. imagine no more. impeltec™ can make this a reality with Windows Intune™.

features

**Simplicity:** with Windows Intune™, impeltec's experts will ensure your end-user assets, including Windows® and mobile devices, are reportable, running smoothly, and are securely managed.

**Always on:** wherever they are, your end-user IT requirements can be fulfilled over the internet. We will manage the deployment of software, compliance of Windows® patches, and we will ensure that malware protection is always compliant.

**Protection:** we will monitor and maintain virus and malware protection levels, ensure your end-user assets are protected, and remove the expense of any additional anti-malware software.

**Predictable budgets:** with streamlined monthly payment cycles. Since the infrastructure is hosted by Microsoft®, and impeltec will manage the resourcing needs, you are mitigating a large risk component from your operational IT budget.

what do I get?

**Peace of mind:** impeltec's expertise will ensure your end-user business environment is operating smoothly. You will also benefit from impeltec's expertise and knowledge in the end-user space.

**Reporting:** if you need hardware and software reporting that you can understand, impeltec's experts will ensure your end-user assets, licences and compliance requirements are tracked and reported in a manner that makes sense to you.

**Feature-rich:** most businesses only skim the surface of their end-user toolset capabilities. Our team will ensure that you are gaining the full benefits of what you are paying for.

**Proactive support:** We will actively monitor your Windows Intune™ managed environment, and identify and fix potential issues to minimise impact.

is it for me?

- Do you need an operational service providing experts to proactively maintain your environment?
- Do you want a solution that automatically maintains its currency with the latest product features?
- Is the cost of effectively managing your end-user assets a strain on your resources and budget?
- Are you looking to limit or reduce your on-premise IT support overheads?
- Do you want your employees' BYODs (Bring Your Own Devices) managed?

details
